point

3.

Run the method **dayWithMostIPVisits** with a HashMap has been created from the method **iPsForDays** on the file **weblog1\_log**.

## Counting Website Visits

What day is returned?  
Practice Quiz, 4 questions

- ☐ Mar 18
- ☐ Mar 20
- ☐ Mar 22
- ☐ Mar 24
- ☐ Mar 26

1  
point

4.

Run the method **iPsWithMostVisitsOnDay** with two parameters—one, a HashMap that has been created from the method **iPsForDays** on the file **weblog1\_log** and two, the day "Mar 17".

One IP Address is returned in the ArrayList—what is it?

- ☐ 77.177.182.67
- ☐ 88.248.192.76
- ☐ 177.4.40.87
- ☐ 200.129.163.70
- ☐ 213.55.90.49
