1.

Which one of the following is a correct version of the code for comparing the name of a country that is in a CSV file that the CSVParser variable **parser** is processing to see if it is the same name as the String variable **country**?

○
```
1   for (CSVRecord record : parser) {
2       if (parser.get("Country").equals(country)) {
3           // do something
4       }
5   }
```

○
```
1   for (CSVRecord record : parser) {
2       if(record.get("Country") == country){
3           // do something
4       }
5   }
```

○
```
1   for (CSVRecord record : parser) {
2       if (record.get("Country").equals(country)) {
3           // do something
4       }
5   }
```

2.

Suppose there is a CSV file with a column named **Exports**. A CSVRecord is used to get a String named **export**, representing the data in this column.

Which one of the following is the correct code for the if condition to determine if both the Strings **exportItem1** and **exportItem2** are in this CSVRecord in the export column?

○
```
1   if (export.contains(exportItem1 && exportItem2)) { }
```

○
```
1   if (export.contains(exportItem1 || exportItem2)) { }
```

○
```
1   if (export.contains(exportItem1) || export.contains(exportItem2)) { }
```

○
```
1   if (export.contains(exportItem1) && export.contains(exportItem2)) { }
```

Which Countries Export...?

Practice Quiz, 6 questions

3

Questions 3–6 refer to the file **exportdata.csv**, which can be found in the .zip download here.

Run your program on the file **exportdata.csv**. What is the name of the country that is listed as the <u>third country</u> that exports <u>both gold and diamonds</u>?

Enter answer here

4. Run your program on the file **exportdata.csv**. How many countries export <u>gold</u>?

Enter answer here

5.

Run your program on the file **exportdata.csv**. Call the method **countryInfo** with the country <u>Nauru</u>. Which one of the following items is listed as an export from this country?

○ Oil

○ Bananas

○ Wood

○ Phosphates

○ Nuts

6.

Run your program on the file **exportdata.csv**. What is the name of the <u>second economy</u> (that is, what is listed on the second line of the output) listed that exports one trillion dollars or more?

Hint: The country's **Value (dollars)** string in the CSV file should have a greater length than the string "$999,999,999,999".

Enter answer here
